

1. Scheduling status

Not scheduled

2. Proprietary name and dosage form

PHYTEXPonent (oral drops)

3. Composition

Each 10 drops / unit dosage contains:

-Allium Sativum(garlic)	10 µ MT
-Triticum repens	70 µ MT
-Echinea purpurea	30 µ MT
-Viola tricolor	70 µ MT
-Matricaria chamomilla	85 µ MT

4. Pharmacological classification

Complementary medicine.

5. Pharmacological action

PHYTEXPonent is a strong stimulant of the immune system.

6. Indications

Aids in stimulation of the body's immune system, providing synergistic effect with antibiotics/antivirals to combat disease. Aids in maintenance of a healthy immune system in healthy individuals.

7. Contra-indications

None.

8. Warnings

Although the normal administered dose is low, extremely sensitive patients can be adversely influenced in their driving ability or ability to operate machinery.

9. Interactions

Not known.

10. Pregnancy and lactation

Do not use.

11. Dosage and directions for use

Shake before use. Normal dose is 1 droplet/kg body weight/day divided into three doses morning, noon and evening. PHYT exponent should be diluted in a cold beverage if required, as certain of the phytoactive ingredients are inactivated at high temperatures and hot beverages are not indicated for dilution. PHYT exponent should not be diluted in products containing caffeine.

Weight	Morning	Midday	Night
30	10	10	10
45	15	15	15
60	20	20	20
90	30	30	30

12. Side effects and special precautions

A mild form of diarrhoea may occur at the beginning of treatment due to the elimination of toxins. As PHYTExponent is an immunological stimulant, caution should be exercised with the concurrent use of immune suppressants and the product taken after medical advice.

13. Known symptoms of over dosage and particulars of its treatment

For severely ill patients the dose can be doubled or even tripled, without signs of overdosage. However, the effects of considerable alcohol administration should be considered.

14. Identification

Dark brown liquid with a typical plant odor.

15. Presentation

PHYTEXponent is supplied in brown glass bottles of 100 ml with incorporated droplet counter and sealed plastic cap.

16. Storage instructions

Store below 25°C.

Avoid direct sunlight. Keep in a dark place.

KEEP OUT OF REACH OF CHILDREN

17. Registry number

NAFDAC REG N° 04-7507L

18. Batch number and Expiry date

On each product the batch number refers to the production date.

The shelf life is three years from production date

19. Name and business address of the holder of the certificate of registration
